AIR & WASTE MANAGEMENT ASSOCIATION PACIFIC NORTHWEST INTERNATIONAL SECTION (PNWIS) AND THE ALASKA CHAPTER

PRESENT

**FALL CONFERENCE ON
ULTRA-LOW SULFUR DIESEL**

**FIND OUT IF ALASKA IS
READY AND PREPARED FOR
ULSD IN 2006/2010**

SEPTEMBER 16, 2005

**BP EXPLORATION, ALASKA
ANCHORAGE, AK**

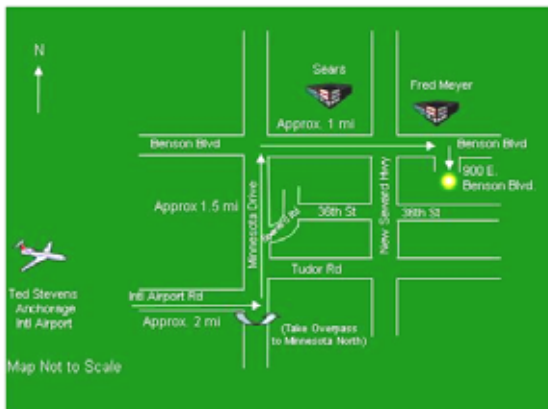

(ULSD CONFERENCE IN SEATAC,
WA ON SEPT. 15, 2005 – SEE
WWW.PNWIS.ORG FOR DETAILS)

*Did you know that highway diesel will be required to contain no more than 15 ppm sulfur by summer 2006? And by 2010, 15 ppm sulfur diesel will be used across Alaska for nearly all diesel engines. There will be **challenges** in meeting these deadlines! New EPA enforcement policies will come into play and questions will arise from fleet operators and other diesel engine users about operational impacts.*

*This conference will provide you with the most up-to-date information about these issues. Attendance at this conference will be a must for refinery staff, fuel distributors, private and public fleet operators, diesel electric utilities, regulators, environmental consultants and others interested in learning about this critical cleaner fuels program. **Updated information will be posted on the PNWIS website (www.pnwis.org).***

CONFERENCE LOCATION:

BP Exploration is located at 900 E. Benson Blvd. (Marked as the Helios on map.) Free parking is available around the building. Conference Rooms A, B, and C are located on the entrance level to the building across from the security kiosk.

PRELIMINARY PROGRAM

- 7:00 – 8:00 Registration/Continental Breakfast
- 8:00 - 8:15 Plenary Session - Welcome (George Snodgrass)
- 8:15 – 8:45 Overview of EPA's Ultra Low Sulfur Diesel (ULSD) Fuel Regulatory Program by EPA (Paul Machiele)
